Site Review Notes

Good job!

1. The purple on the sides is really bright and kinda hard on the eyes. I would darken it and make the purple part thinner so it doesn't take up so much of the page.

2. I liked on the mockup how it started with a picture and text over it . (also a little confused about the wikipedia sub text haha)

3. The text is a little too bold, and not enough white space.

4.I wish there were more images and variety in image size when they are added

5.also on the more nit picky side can you take out the [] in the paragraphs

6. I really like how the states break up into two paragraphs!

7. also i thought we were putting tabs at the top to bring the user down to the different sections
